Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 21 July 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

A request for continued examination under 37 CFR 1.114 was filed in this application after appeal to the Board of Patent Appeals and Interferences, but prior to a decision on the appeal. Since this application is eligible for continued examination under 37 CFR 1.114 and the fee set forth in 37 CFR 1.17(e) has been timely paid, the appeal has been withdrawn pursuant to 37 CFR 1.114 and prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on 7/21/03 has been entered.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

1. The definition of R^{10a} and R^{11a} is circular. It is defined in terms of itself.
2. Also, the definition of Het is circular. It can have R^{10a} and R^{11a} as substituents, but these themselves can be substituted by Het, which starts the definition all over again.
3. The definition of Het includes R^{12a} and R^{13a}, but these variables are not defined.

Art Unit: 1624

4. In the first branch of claim 1, the words "the residue of" should not have been deleted. OT is the residue, not the alcohol itself.
5. The definition of R^{10a} and R^{11a} includes the term "as appropriate". What does that mean? Appropriate for what?

Claims 1-3 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The term "hydroxide trapping agent" is indefinite for reasons set forth in the First Action on the Merits. In the first branch of claim 1, there is set forth what it means there, but not in the second branch. Putting the same "which is....TOC(O)W" claim language into the second branch will fix the problem. The problem exists also in claim 2 which is not dependent on claim 1.

Claims 1 is rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for most substituents, does not reasonably provide enablement for halo substituents. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make the invention commensurate in scope with these claims.

The reason was given previously. While fixed in one place, halo is a substituent choice for 5 choices of R1, R2 , and R3 and 7 choices in R4, and 2 groups in Z. It is also is a choice for Z, R2 and R4 itself, and is a substituent on Het. Further, while Haloalkyl was removed from R4, it is still present as a choice for R3, R10, R11 and Het.

Specification

The page 36 structure is poorly drawn. It makes the compound appear to have a large ring in the middle. The ethyl of the ethoxy needs to be flopped in the other direction.
